Professional Summary

Backend-focused Software Engineer developing Java 17 and Spring Boot services at IDeaS. Built REST and gRPC APIs, upgraded a 20-module Spring Boot application, and improved MongoDB data access. Used Spring MVC in production. SQL, MySQL, JPA and Hibernate experience comes from PG-DAC and an in-progress Store REST API project.

Technical Skills

Production backend: Java 17, Spring Boot, Spring MVC, Spring Security, REST APIs, gRPC, Protocol Buffers, microservices

Production data and tools: MongoDB, Mongock/Mongobee, Git, Gradle, Maven, GitHub Actions, Docker, Linux, JUnit, Mockito

Production frontend: Ember.js, TypeScript

Project / PG-DAC training: SQL, MySQL, Spring Data JPA, Hibernate, Flyway, OpenAPI; Kotlin, Jetpack Compose; React.js (basic)

Professional Experience

Software Engineer, IDeaS - A SAS Company | Oct 2024 - Present | Pune, India

- Designed and implemented Spring MVC REST APIs and separate gRPC APIs for cross-product communication, with pagination, filtering, audit information, and backward-compatible Protocol Buffer contracts validated through contract-style tests.
- Optimized MongoDB data access using targeted indexes, bulk reads, and batched audit retrieval; developed migration logic to transform and upsert legacy records.
- Upgraded a microservice application across 20 Java modules from Spring Boot 2.6 to Spring Boot 3.5, redesigning security configuration for Spring Security 6, migrating Jakarta APIs, and upgrading five generated API-client modules.
- Built Ember.js/TypeScript configuration and reporting workflows with reusable multiselect components, input validation, and conditional rendering; consolidated logic and removed redundant service calls.
- Applied GitHub Copilot and iterative agent workflows across feature development, RCA, scenario design, debugging, and code review to shorten delivery cycles while retaining ownership of design decisions and validation.

Application Developer, Data Nova India Pvt. Ltd. | Feb 2023 - May 2023 | Noida, India

- Developed ERP mobile application modules using MVVM, separating user interfaces from presentation and application logic.
- Improved API-backed data retrieval by approximately 30% by refining retrieval logic and eliminating unnecessary processing in ERP workflows.

Projects

Store REST API (In progress | project and PG-DAC skills)

- Implemented cart-management REST APIs using Java 8+ features and Spring MVC with controller/service/repository separation, DTO mapping, request validation, exception handling, SQL/MySQL persistence through Spring Data JPA/Hibernate and Flyway migrations, and Swagger/OpenAPI documentation.

UNITY - Peer-to-Peer Music Sync (Functional prototype; AI-assisted)

- Designed the architecture and protocol for a local-network Android music session with leader/follower control, device discovery, pairing-code joining, and synchronized queues.

Education

PG Diploma in Advanced Computing (PG-DAC), C-DAC | Mar 2024 - Aug 2024 | Pune

B.Tech, Computer Science & Engineering, Dr. A.P.J. Abdul Kalam Technical University | 2020 - 2023
